Abstract

Introduction:
This paper presents a case of a 22-year-old female from continental Europe, who was suffering from PCOS symptoms and hormonal shifts, availed distal YPV healing sessions online by joining a Healing camp organized by a group of healers based in India, with successful results.

Method:
This study used in-depth case study method, going through patient case history, healer’s documents of healing intervention, and detailed patient feedback.

Results:
After attending the 1st day of the 5-day healing camp, the patient got her periods resumed after 2 years with normal flow. Her acne, much of cramps and pain during periods reduced considerably after the 2nd day of healing. On the 4th day of healing, she felt very light, grounded, very relaxed, clear minded and full of positive energy. Other improvements, such as reduced facial hair, acne and depression, were found through the month-long distal healing intervention.

Conclusions:
YPV distal healing protocols have been established as successful treatment methods of cure for many types of diseases, both as complementary and alternative medicine (CAM), as is evident from this case as well as several other documented and published literature. There is immense scope for further research using appropriate sample size and methodology to study this phenomenon further. Recommendations include training medical and frontline healthcare personnel in using low-cost no-drug YPV healing protocols to complement their treatment efforts including sustaining their own health.

1 | INTRODUCTION

Hormonal shifts and PCOS-like symptoms:
Symptoms in women such as infrequent or prolonged menstrual periods, excess or undesirable hair growth such as facial hair, acne, and obesity can occur in a condition known as PCOS (polycystic ovarian syndrome). Infrequent or absence of menstruation may raise chances for this condition in adolescents [1]. PCOS is a common endocrinial disorder of female reproductive age with varied complications, and is prevailing now-a-days among adolescent females. The prevalence of PCOS among general population throughout the world is found to be 5%-10% in the women of reproductive age. About 40% women with PCOS experience depression, particularly young girls. The exact cause of PCOS is not yet known. Early diagnosis and treatment along with weight reduction protocols shall reduce risks of long-term complications. As a result of PCOS along with the physical disturbances, depression and anxiety also occur commonly in women which are often sidelined and left untreated [1]. Hormonal shifts are also believed to be a cause for such symptoms, and usually lifestyle changes are considered helpful in controlling such shifts.

A combination of lifestyle changes and medications to treat PCOS are needed by many women patients. Medical doctors create a treatment plan tailored to treat individual’s symptoms [2]. Birth control is the most common PCOS treatment for women who don’t want to get pregnant. Hormonal birth control pills, a skin patch, vaginal ring, shots, or a hormonal IUD (intrauterine device) -- can help restore regular periods [2]

Yoga Prana Vidya (YPV) System:
YPV system has been scientifically synthesized from ancient texts and it is integrative and holistic in approach, and documented evidence gathered from experience shows that it is successfully applied as complementary and alternative medicine for a wide range of illnesses. YPV system consists of three parts – one is a set of self-practice modules for patients and generally for all, while the second part is energy healing which is given to the patient by a trained healer, or alternatively, the patient can perform self-healing after learning healing techniques from qualified YPV trainers. The third part of YPV system is saltless, balanced and controlled diet including fruit diet and raw diet to help the physical body to be healthy and to maintain its metabolism with sufficient energy levels.

YPV healing can be delivered either in proximal mode or in distal mode. In proximal mode the healer delivers healing energies facing the patient in the same room. In distal mode the healer delivers healing energies to the patient situated far away, even hundreds or thousands of Kilometres away, making use of earth’s energy field as a medium. Published literature shows there are more than 55 publications of research articles on successful applications of YPV healing to treat various illnesses. Published successful case reports include, treatment of difficult medical cases [3], diabetes management & control [4], removing arterial block in heart without surgery [5], vision improvements for participants of an Eye Camp [6], improvements in holistic wellbeing and immunity of participants in a one-month YPV intensive programme [7], Role of Yoga Prana Vidya in first aid and emergency [8], speedy recovery of COVID patients [9], treatment of hypothyroidism [10], Lowering academic anxiety and enhancing academic performance of high school children [11], saving life of a snake-bitten human female [12], managing the pain and side effects of a Hodgkin Lymphoma patient undergoing chemotherapy [13], healing treatment of a female patient suffering from kneecap dislocation [14], Treatment and cure of PCOS condition [15], a case of breast cancer successfully treated [16], De-addiction cases [17], etc. A review of published literature shows some experimental studies also conducted with successful outcomes such as improvements in the wellbeing of prisoners [18], significant reduction in anxiety and depression in corporate employees [19], improvements in the cognitive abilities and social behaviour of mentally challenged children [20].

This paper presents a case of a 22-year-old female from continental Europe, who was suffering from PCOS symptoms and hormonal shifts, availed distal YPV healing sessions online by joining a Healing camp organized by a group of healers based in India, with successful results. After gaining firsthand experience of receiving YPV healing successfully, she had also availed online learning of YPV protocols and practices from a trainer based in India, and became a healer herself.

2 | METHOD

This paper uses in-depth case study method, by going through patient’s full case details and feedback, and the healer’s case documents.

CASE REPORT
Patient was a 22 years old female, named Hazel (Pseudonym used to conceal identity) based in a European country.
Brief medical History:
Hazel struggled with hormonal imbalances starting puberty. The following is an account of her troublesome symptoms.
1. No periods.
From the age of 16, she was on contraceptive pills for 4 years. She stopped taking pills, when her periods stopped coming. From then, for next 2 years she didn’t get her periods at all.
2. There were hormonal imbalances.
3. Acne: She used to have a lot of acne on her face, chest, and her back.
4. Facial hair on sides of chin, thick & black, hair on nipples & belly.
5. Low progesterone levels & irregular ovulation.
6. Hypothyroidism as a result of the pills.
7. Low energy levels and frequent bouts of tiredness and fatigue.
After the diagnosis with hormonal imbalance and hypothyroidism, she took medical treatment.

Details of healings:
Distal healing for Hazel was started in the camp from 18th January 2021 and went on upto 22nd January 21 (Five days), with one session per day of duration 45 minutes to 1 hour. Afterwards, she continued taking healing sessions for a month from 1st February to 27th February 2021. During February, 2021, 21 days of healing sessions were conducted for Hazel with a frequency of 5 days a week, and each session time of 45 minutes to 1 hour per day.

The healer used the following YPV healing protocols, throughout the intervention to heal Hazel.
a) YPV Psychotherapy to reduce fear, stress, anxiety, depression, and to raise self-esteem.
b) Regeneration of reproductive organs with emphasis on uterus & ovaries, instructions to pituitary gland to secrete proper hormones for getting periods & reducing pimples on face, with a miraculous healing technique.
c) Strengthening physical body to overcome fatigue, and improve energy levels.
d) Blood cleansing protocol through lungs.
e) Internal organs cleansing protocol.
f) Cleansing spleen, kidneys & liver to remove toxins.
g) Protocol to reduce hair growth on face.
h) Protocol for hypothyroidism.

Training in YPV practices:
Hazel had done YPV Level 1 training online and intended to learn higher courses. Further to it, Hazel completed her training of YPV Level 2 and further also did YPV Level 3 (psychotherapy) course.

3 | RESULTS

Very first and immediate result Hazel experienced was on the night of Day 1 healing, when her periods began again after an interruption of 2 years with normal flow, which made her feel extremely happy and grateful to her healer.

Her acne increased a little initially though, as it happens like clearing out. Her periods too started with too much of cramps and pain which reduced completely after 2nd day of healing. On 4th day of healing, she felt very light, grounded, very relaxed, clear minded and full of positive energy. Other improvements were found such as reduced facial hair and hair around other undesirable areas in the body.

To quote Hazel’s words - “after the 1st day, healing session number 1, I went to bed that night & woke up with my period, which I was so excited & grateful for. I did experience a little cramping & pain, but nothing compared to what I used to have before getting off the pill or starting the pill. But nothing compared to what I used to experience & after healing session number 2 that day, the pain & cramping was gone as well.”

Hazel continued stating further experience of healing sessions received – “During that week, I then started noticing in that my skin was looking a lot smoother & starting to heal. Now all I can see on my face is acne scars, pimples that are still healing & what was really incredible that I found now after completing this Healing camp with my healer, was that my facial hair stopped growing so rapidly. So, I just removed it yesterday. I removed all my hair here & on my chin, on my neck & nothing is growing.
Role of Yoga Prana Vidya System protocols in successful distal healing treatment of PCOS symptoms and hormonal imbalance in a 22-year-old female patient: A case study

Many OC formulations can provide menstrual regularity, treating both menorrhagia and dysmenorrhea. They can even be utilized to induce amenorrhea for lifestyle considerations[21]. A successful case of application of Yoga Prana Vidya protocols in the treatment and cure for PCOS [15] shows that persistent long-term healing treatments using YPV protocols with a disciplined lifestyle cured this condition successfully.

5 | CONCLUSIONS

YPV distal healing protocols have been established as successful treatment methods of cure for many types of diseases, both as complementary and alternative medicine (CAM), as is evident from this case as well as several other documented and published literature. There is scope for further research using appropriate sample size and methodology to study this phenomenon further. It is highly recommended that medical and frontline healthcare personnel may be trained in using low-cost no-drug YPV healing protocols to complement treatment efforts for holistic healing of patients at affordable cost.
